

Designed for Distinction

Arivo™ brings access control technology and architectural design together in a refined, adaptable stanchion solution within one cohesive form. Designed to preserve architectural intent while supporting a welcoming entrance experience, Arivo combines flexible configurations, integrated technologies, and specification-friendly options to help bring design and access control together.

Product Features

- Integrated access control technologies behind a common faceplate
- Flexible 46" and 56" stanchion configurations
- Compatible with a wide range of access control devices
- Four standard textured finishes plus custom powder coat options
- Dual-sided configurations
- Adaptable design supports evolving technology needs
- Anchoring options to meet most any site requirements

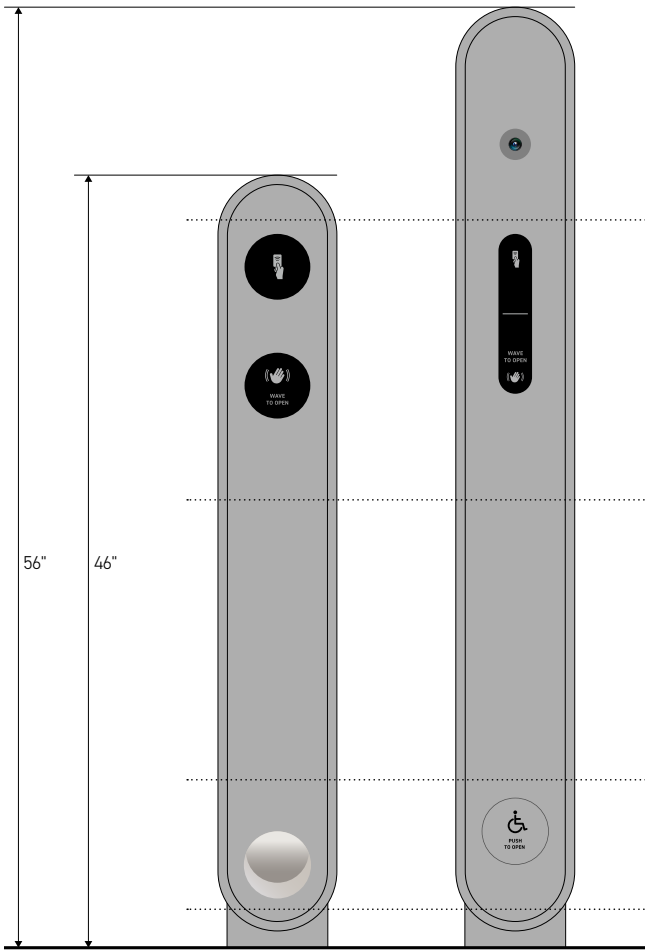

Supported Technologies

- Credential Readers
- Intercoms
- Cameras
- ADA Access Devices
- Combination Units
- Wave-to-Open Devices
- Path Light Modules
- Charging Access

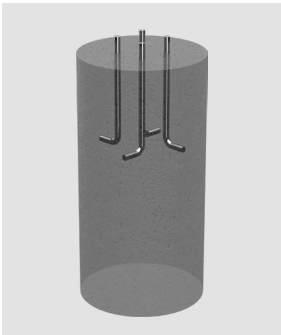

Configurations

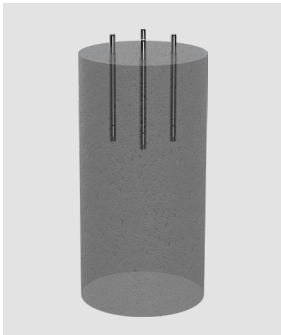

Specs & Data

Material	Details
Material	Cast and extruded aluminum
Faceplates	Aluminum
Height Options	46" and 56"
Technology Mounting Method	Front, rear, both
Concrete & Anchoring	Min 12" diameter, min 24" depth
Welding	TIG (Tungsten Inert Gas) only
Electrical	— Input: 85-264 VAC, 120-370 VDC — Output: 12 VDC — With white LED: 120 VAC
Finishes:	— Black Textured — Charcoal Textured — Silver Textured — Bronze Textured — Custom options available

Anchoring Options

Poured Concrete
L-Bolt
Part: L-Bolt-625

Existing Concrete
Wedge anchors
Part: Stud-Anchor-625

Finishes

Black
Tex

Pompeiiian
Gold

Stainless
Steel
Tex III

Dark
Grey
